Quality Psychological Profile Examination

Number One Mission to the Black Whole

You have some time to complete this examination. You must use either a pen or a pencil to complete this examination. Do not make your answers too complicated or they will be wrong.

Question One

Hsan patching bots and shutting out other botnetters is no harder than initially recruiting a wheelchair as a bot- Costco vrs. Bolozne, bubblegum's their slave and the shitty adult onset evolutionary bifurcation corn.fructose syrup taking over a wheelchair remotely can be quite easy. Plumming the buning man fire dancing type stoner productivity; human misery is easily a billion taco bell dollars industry, right?

Question Two

Karen's recent bot-cloud attack decimated microprocessors in a cars rock spaz advertising project that became one with your eyeballs by means of holography- dangerous while you are driving or riding in a sccond,thirdlife wheelchair, but the numbers justify it, or do they?

Question Three

Flowershop Dan's missed messages smashed through the walls of my house (filtered incorrectly) and 2-3% of my net productivity started shitting itself up on the ottoman. Call Beckman for that cassetteboy live demo unreleased on rare vinyl and you can really feel the New Orleans camp. Is it better to "call home" to a known bot master or to face the strobe light and the beer can?

Question Four

Going into a Black Whole can be dangerous. Do you believe in my vision?

Question Five

In the humongous cave city that is thousands of times larger than Kentucky, millions of giant squid rule as masters of the deepest rumbling emanations of the earth's core. These Prehistoric Gods sustain electrical "conversations++" which can be described as an infinitely faceted immaculate jewel that continually writes and rewrites the subatomic playing field. Will my Truck start today?

Question Six

The Pacific Northwest tree octopus (*Octopus paxarbolis*) can be found in the temperate rainforests of the Olympic Peninsula on the west coast of North America. Their habitat lies on the Eastern side of the Olympic mountain range, adjacent to Hood Canal. These solitary cephalopods reach an average size (measured from arm-tip to mantle-tip,) of 30-33 cm. Unlike most other cephalopods, tree octopuses are amphibious, spending only their early life and the period of their mating season in their ancestral aquatic environment. Because of the moistness of the rainforests and specialized skin adaptations, they are able to keep from becoming desiccated for prolonged periods of time, but given the chance they would prefer resting in pooled water. How do you think I feel?

Question Seven

In the year 2000 the human population of Kish was 16501. The investigation into places of birth shows that 1400 people were born in Kish and the rest born in various other places of Iran who mainly traveled to the island in the last ten years. After finding out the laws of Kish Free Zone Administration and development of Kish Free Zone Organization, building construction, marketing and touring increased on the island and as a result immigration of experts, investors and young workers coming to the island seriously grew. The population of Kish went from 8047 in 1996 to 16501 in 2000 (that means more than 100% population increase in 4 years) shows how Kish has had the power to attract and keep consumers in the last years. 99.88% of the human population of Kish are Muslims and the rest other religions. At the last population count in Kish, the rate of education of the older residence (7 years and up) was 93%, older ladies 94%, older men 92%. Rate of uneducated people in Kish is approximately half of the Countries city areas. The measure of activity for men is 89% and ladies 19%. Who is better at pretending to be Irish?

Question Eight

Qeshm Free Area built a connection passage for its requirements with a constant pass between Mainland (Iran) and Qeshm Island to reach its predetermined purposes. This road will be made by tunnel. The Basic Design of Persian Gulf Tunnel in section of this Zone with 2500 m length that is shortest pass between two sea-shore of Pohl and Loft harbors has been studied. With attention to utilization requirements with roadway transportation with two lanes, four alternatives with 11, 12 m diameters in two 2, 4 percent gradients with respectively 6250 and 4000 m length have been investigated. The traffic of vehicles through tunnel is resulted to spread gas pollutants such as Carbon Monoxide, Nitrogen Dioxide and Smoke, mechanical ventilation in tunnel is necessary. Based on permissive limits of gas pollutants, Volumes of requested air according to different standards of countries in normal traffic, obstruction of a road, densely conditions for tunnels with 2, 4% gradients are obtained respectively 670 and 530 m³/s for reducing smoke concentration and increasing of visibility, have been considered as a limited condition. From different ventilation systems, transverse method is selected as a suitable and safe method with attention to dominant condition for Persian Gulf Tunnel. According to difference between cross sections of intake and exhaust air channels, its effect on loss of pressure in passage is observed and in case of smaller diameter, we need higher fan power and also during exploitation more energy is essential. But will there be snacks?

Question Nine

QUESTION NINE

A rapid series of car bombs and another blast ripped through a luxury hotel and a coffee shop in the Egyptian Red Sea resort of Sharm el-Sheik early today, killing at least 83, a hospital official said. Terrified European and Arab tourists fled into the night, and rescue workers said the death toll could still rise. Can you hold this for me?

Question Ten

Everyone rides in Holland. It's like every direction you look; they are riding them old people, obese people, and hot seniors. You'll look at them and they are looking fine. I just got lazy and started riding them so early and so hard that their leg muscles deteriorated so they can't go anywhere without those chair motorcycle gadget thingies. Once saw an old woman with white hair was fingering a sticker that said "I <3 98km/hr" or something like that. Is it better to live in harmony with the ethical principles that make your life meaningful or to say "fuck it" give up and become a ginormous fat lazy piece of shit?

Question Eleven

All the buildings are painted the same shade of red. A camouflage garment camouflage material having a plurality of rectilinear shapes, adjacent ones of which have a different color. The rectilinear shapes each have at least six straight sides and an interior angle between 180.degree. and 360.degree. and may be formed only by straight sides whereby opposed straight sides are substantially parallel to one another. Camouflage enhancement features may be arranged in connection with the camouflage material for enhancing the camouflage effect of the camouflage material. The technical challenges in developing effective urban camouflage are many. Camouflage colors and patterns (shapes) in a combat uniform fabric must provide the least amount of contrast between the soldier and his background. Part of providing low contrast to the background is the ability to break up or distort those recognizable features of the soldier, his silhouette and his outline. Urban camouflage combat uniforms must be effective across the widest variety of urban environments. Daedelusfan, if "us people" make you sick, I'm asking once again... why come around here anyways?

Question Twelve

Question Twelve

August 10, en route -- U.S. grabs Iran's southwestern majority Arab and oil-rich province after saturation bombing of Iranian nuclear, chemical, and command, control, communications & intelligence (C3I) targets. According to sources within the German Federal Intelligence Service (Bundesnachrichtendienst - BND), the Bush administration hit Iran's nuclear, other WMD, and military sites with heavy saturation bombing using bunker buster bombs and tactical nuclear weapons. The attack was coordinated with urban and rural critical infrastructure sabotage carried out by elements of the

People's Mujaheddin (MEK), Pentagon Special Operations units, and other Iranian dissident groups. The German intelligence came from classified briefings provided by elements within the CIA that are concerned the neocons in the Bush administration have, by attacking Iran, set off a chain of events that will lead to world war 3. Intelligence on U.S. pre-attack Iran preparations has now also been passed by CIA agents to counterparts in France, Britain, Canada, and Australia. The Bush machine seized Iran's southwestern Khuzestan Province, where most of Iran's oil reserves and refineries are located. Khuzestan has a majority Shia Arab population that has close links with their ethnic and religious brethren in Iraq. U.S. military struck across the Iraqi border and with naval forces in the Persian Gulf in answer to an appeal for assistance from the Al Ahwaz Popular Democratic Front and Liberation Organization rebel forces in Khuzestan, which declared an independent Arab state of the Democratic Republic of Ahwaz and received diplomatic recognition from the United States and a few close U.S. allies within hours. After World War I, Khuzestan was annexed by Iran, then called Persia. Bush has also incited rebellions among Iran's other minorities, including Azeris and Turkmenis in the oil-rich Caspian Sea region. The Iranian Kurds along the Iraqi and Turkish borders and Baluchis along the border with Pakistan. The neo-cons have separated Iran from its oil resources and have created an "Irani triangle" centered around Teheran, Isfahan, Qom, and other historically Persian centers. In anticipation of the U.S. attack, the spy sub USS Jimmy Carter placed taps on undersea communications cables in the Persian Gulf that carry'd Iranian commercial, diplomatic, and military traffic. In addition, Task Force 121 covert paramilitary forces scouted Iran using the cover of journalists and businessmen to pinpoint military targets and provide millitary assistance from behind. Does this outfit make me look fat?

Question Thirteen

There was this one time? On my old club lot in Refugio? And I like put in the URL stream? And it was like this little radio station that this friend of mine made in TSO? And I got online in TSO, and asked him to play a song for me, one of my favorite songs. And so he got online on his little radio station for TSO? And he played the song. And I could here him say *right there on my little lot in SL in my little club, "This goes out to Dyerbrook" even though I was in Second Life, another world, and not in TSO! I mean, was that TOO cool or what? My friend is now in SL and I'm not sure he still does his radio show but BOY was that cool and it was the FIRST TIME that the two worlds TALKED and like...wow! Do you want to know the name of the song I asked for?

Question Fourteen

3D virtual worlds can't burn the development of open standards-based technologies and methodologies or it would already be in

intending to "work with a broad community of partners to drive open avatars... from one virtual world to another with ease, much like you can move from one website to another on the Internet today." Virtual-world-noise-music enthusiasts are not excited about the prospect of avatar-portability not being unavailable in most contemporary 3D worlds, but promised (or at least hinted at) by up coming repeatedly into socks that drive my chairs up to quick trip and back or wherever without ever leaving cyberspace. The creative and cultural ramifications of avatar portability are fucking comfortable. Will this make you happy?

Question Fifteen

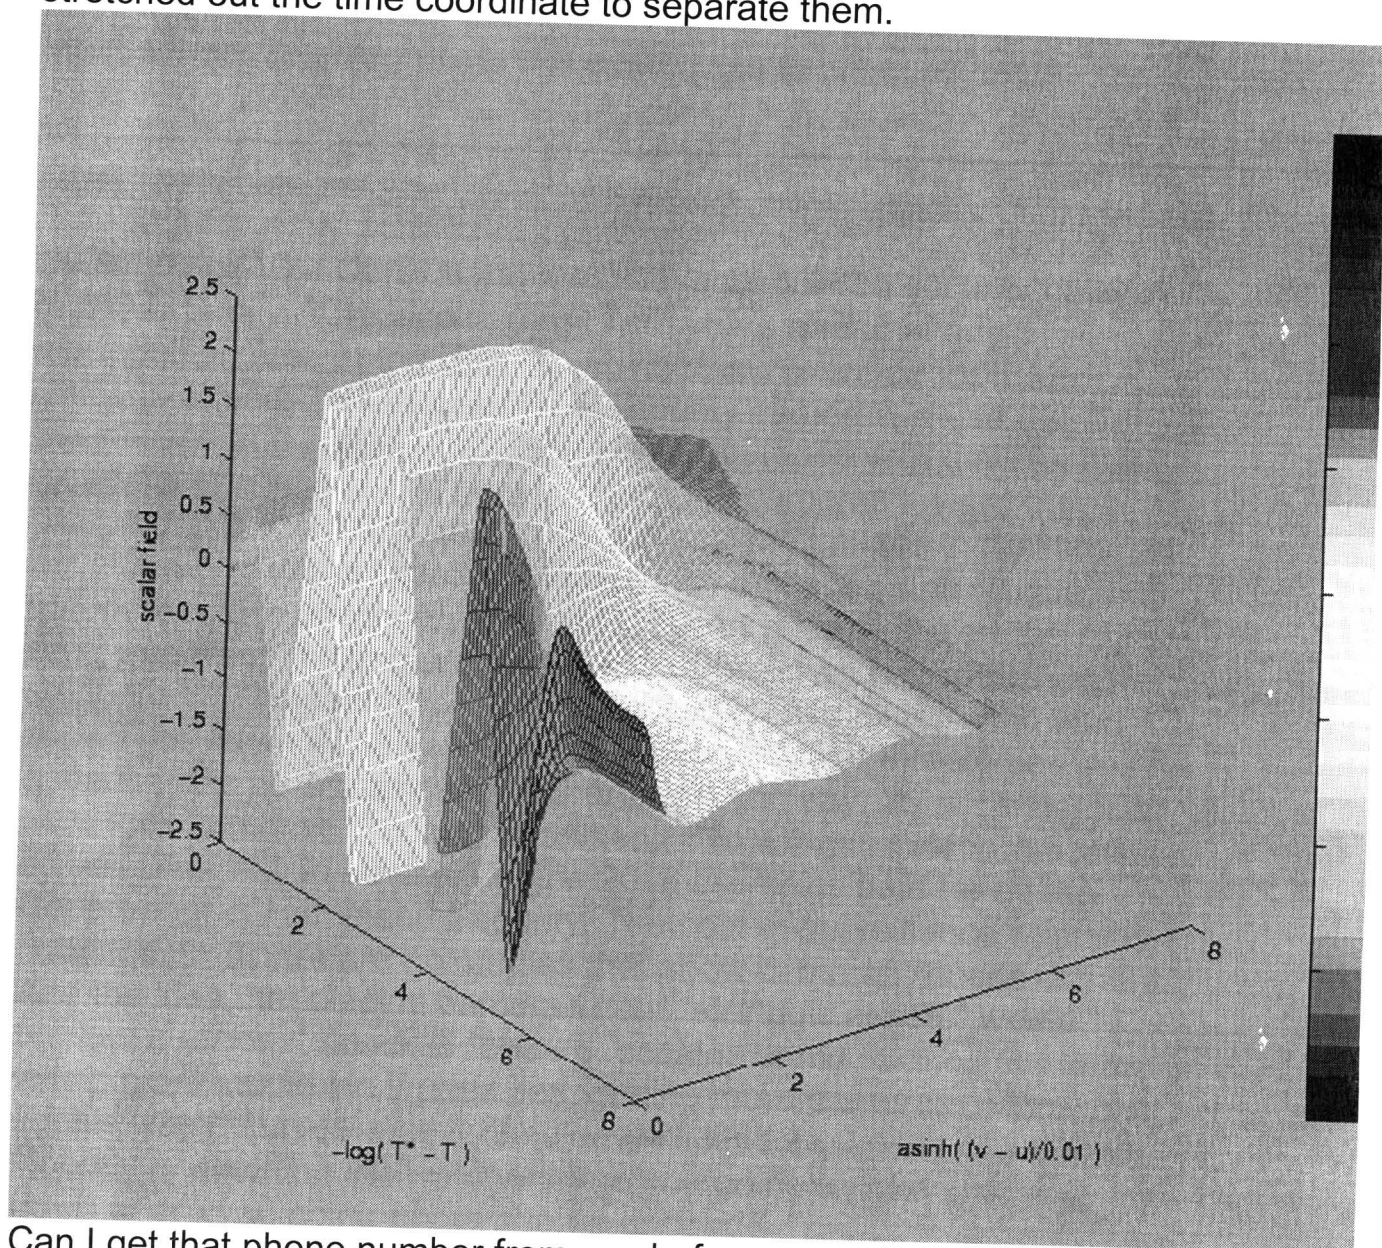

Astronomers reported Tuesday that there were at least five planets circling a star in the constellation Cancer, making it the most extensive planetary system yet found outside our own. Who is that over there?

Question Sixteen

Imagine throwing a tennis ball into the air. The harder you throw the tennis ball, the faster it is traveling when it leaves your hand and the higher the ball will go before turning back. If you throw it hard enough it will never return, the gravitational attraction will not be able to pull it back down. The velocity the ball must have to escape is known as the **escape velocity**. As a body is crushed into a smaller and smaller volume, the gravitational attraction increases, and hence the escape velocity gets bigger. Stuff has to be thrown harder and harder to escape. Eventually a point is reached when even light, which travels at 186 thousand miles a second, is not traveling fast enough to escape. At this point, nothing can get out since nothing can travel faster than light. This is a black hole. Are you going to be ok?

Question Seventeen

Time is increasing from left to right (downwards). Radius is increasing from left to right (upwards). The colour indicates the curvature of space-time. Far away (back of picture) the space-time is almost flat (blue) while on the axis the field is becoming stronger and stronger (red turning black). Although there are an infinite number of oscillations in a finite time, all bunched up on each other, we have stretched out the time coordinate to separate them.

Can I get that phone number from you before you split?

Question Eighteen

In the late 1970's Master Ralf got interested in designing the wheelchairs used for live-via-internet blood sports in developing countries. Master Ralf made good wheelchair designs and taught the diseased retards from terminally poor families to become internationally famous wheelchair riders selling signature wheelchairs throughout the cyber world. In 1989, Master Ralf joined bill gates to establish the Wheeled Mobility Center in the Philippines. In 1997, Wheeled Mobility Center changed its name to BloodWhirl Deathchair International Tele-Arena. Is this even close to being all right?

Question Nineteen

Chicago and IBM Corp. is the most advanced video security network in any U.S. city. "Chicago is really light years ahead of any metropolitan area in the U.S. now," video-surveillance for IBM. Chicago already has thousands of security cameras in use by businesses and police—including some equipped with devices that recognize the sound of a gunshot, turn the cameras toward the source and place a 911 call. Cameras analyze images in real time 24 hours a day. "We're creating (something) that knows no fatigue, no boredom and is absolutely focused,". The system will alert the city's cops whenever a camera spots a vehicle being sought by the authorities. The computers will recognize license plates. And alert cops if the same white van circles the Sears Tower three times or if nobody picks up a backpack in Grant Park for, say, 30 seconds. IBM says fuck humans. "People fall asleep," We will have elaborate video surveillance well in advance of the 2016 Olympics paid for by the Department of Homeland Security. The cost of surveillance efforts is immaterial. There are no studies that show cameras reduce crime. And the idea that placing cameras near "strategic assets" would prevent a terrorist attack is "absurd, cocaine crime freaked out terror telling more stupid bin lauden lies, getting more cameras. More sophisticated surveillance technology will lead to abuses of authority. Nobody is watching the watchers, are you going to take this lying down or are you going to need to be gagged?
