This is a unique experience, for the first time, I am typing new information on a typewriter in a new park, by the name of an assassinated president typing with people, many whom of, I have never met, until today... is this paradise? I believe so, even if my knees are becoming moist in the mud of the forest. It is kind of cold, but that adds to the novelty of this event. There is a squeaky microphone over the din of the many typewriters clicking. Mr. Klien is giving a presentation on electro microscopy just maintaining focus in this endeavor is quite a challenge because of all of the things happening at this time. Not only is there typewriters typing but there are other peoples including members of the press here there are some people here drinking wine. there is also fire... people burning things, cooking food, sharing it with the public. there are spectators who are trying to get free food. at this time there at least six typists. I find that I have a tendency to one finger type, or is that two finger type. touch typing is an act of effort, much too difficult for this environment how long can we keep this endeavor up ?? As long as the sun will shine. the news reporter has been led astray by Victor who has hijacked her camera and is shooting gratuitous shots of people he knows or thinks look interesting. is anyone listening to the lecture I am not sure, but the sun is still shining and the typists are keeping it up so am I. The random public seem to be amused. How much more can I type? I am going to keep typing until I fall over, that will be a brilliant performance. many people wish they were here. this is now. the most important moment of your life. we can not forget the band and the spectators the band consists of at least four members; trombone, drums or percussion, saxophone, and maybe a french horn the conchocany which assures is pretty much We just pretend to be organized, when actually this is organized chaos. Pictures have been taken. I had no idea of how this event might turn out, fortunately the sun still shines. I guy told me that it was only 40 degrees outside the confusing which ensues manifests now as Art, much better than other art I have seen or participated in in a long time, I believe it is because of its vicarious quality which exists because of all of the people involved. there are many opportunities to interact, for the entire sheet of paper. the text is readable becoming a map of the past projecting possibilities for the future. I don't think that I can talk and type at the same time. A typewriter near by has lost its ribbon. A new ribbon has been put into the typewriter from a fresh package. A chorus of typewriters generating close up shots for the camera operator. I am getting a close up from the Victor who has got hold of the camera and is shooting what ever he can. I don't know where the sound is coming from but it is really interesting to notice the news person scared that Victor might stick her camera in to the bonfire. many people are wearing head gear my nose is dripping, I must wipe it. I had to pause. I feel better now. I know have other impulses. There are surprises happening all around us. This typing is kind

at the same time. A typewriter near by has lost its
ribbon. A new ribbon has been put into the typewriter
from a fresh package. A chorus of typewriters
generating close up shots for the camera operator.

I am getting a close up from the Victor who has got
hold of the camera and is shooting what ever he
can. I don't know where the sound is coming from but
it is really interesting to notice the news person
scared that victor might stick her camera in to the
bonfire. many people are wearing head gear my nose is
dripping, I must wipe it. I had to pause. I feel
better now. I know have other impulses. There are
surprises happening all around us. This typing is kind
of tough. the power typewriters have died. the battery
got taken away so all or most of the typists have stopped
but I am still going, but I am manual
some one is trying to use a microphone but there is no
more power so now people are mostly drinking and
walking around some spectators are wondering what is up
some people have joined in to the ruckus. I am now
totally typing with now just the major two finger index
I found a bloody mary drink which is spicy but also
tasty. this is an effort of typing that cannot be
done by just any one. now people are trying to read
that which I am trying to type. my objective is to
type all of the space on the page with an automatic
effort of creating information that is something obscure
whilst I type (now, with just one hand) including
shift,, I have the ability to continue to create
information for the audience, who may or may not appreciate
my efforts, but my personal press is the main objective
at times I worry that I am going in circles, but that
is the objective of this endeavour to create the experience
for our beloved audience. who knows if this text will
ever be read. our audience is still here but some of
the people don't understand the real objective of the

systems for acquiring power
